PROFESSIONAL SUMMARY

Frontend Developer with 5 years of experience building scalable, high-performance web applications using ReactJS, JavaScript (ES6+), TypeScript, Node.js, and Express.js. Skilled in developing responsive user interfaces, reusable React components, real-time systems, AI-powered platforms, and REST API integrations. Strong expertise in ReactJS, Redux, Context API, Next.js, state management, backend service integration, and performance optimization. Experienced in developing and integrating REST APIs, building Node.js and Express.js backend services, implementing WebSocket and streaming APIs, and integrating secure payment solutions using Stripe. Strong understanding of modern frontend development, full-stack JavaScript application architecture, Agile development, Git, Docker, and CI/CD workflows.

TECHNICAL SKILLS

Frontend	ReactJS, JavaScript (ES6+), TypeScript, HTML5, Next.js, React Hooks, Redux, Context API, Custom Hooks
Backend & APIs	Node.js, Express.js, REST APIs, GraphQL APIs, API Integration, Backend Service Integration, WebSockets, Streaming APIs
UI & Styling	Tailwind CSS, Bootstrap, Material UI, Responsive Design, Figma
Core Concepts	Frontend Architecture, Performance Optimization, Code Splitting, Lazy Loading, State Management, API Integration, Real-time Data Handling, Unit Testing
DevOps & Tools	Docker Containerization, Git, GitHub, GitLab, Jenkins, GitHub Automation, CI/CD Pipelines, Jira, Postman, Netlify
AI & Integrations	LLM Integration, Agentic AI, Agentic Workflows, D-ID, Stripe Integration, Firebase, Real-time Applications
Methodologies	Agile Development, Code Reviews, Debugging, Performance Optimization, Code Quality, Software Development Lifecycle
Soft Skills	Problem Solving, Team Collaboration, Time Management, Communication

PROFESSIONAL EXPERIENCE

Software Engineer	Jun 2025 - Jun 2026
Talks & Talks	Kochi, India
- Developed and integrated Agentic AI APIs for email automation and HR onboarding workflows, improving process efficiency and enabling AI-powered application experiences. - Implemented real-time streaming APIs and WebSocket integrations to enable live data synchronization and responsive application interactions. - Integrated Stripe payment gateway for subscription management, recurring billing, and secure transactions. - Built AI avatar interaction features using D-ID for real-time voice and video communication. - Integrated frontend applications with backend services and APIs to support data-driven application workflows. - Optimized frontend performance, reducing page load times by 30% and improving overall user experience. - Contributed to scalable frontend architecture using ReactJS, TypeScript, reusable components, state management, and modern JavaScript development practices.	
Associate Consultant	Mar 2024 - May 2025
Infosys	Bangalore, India
Developed reusable and scalable UI components using ReactJS and modern JavaScript development practices based on Figma designs.	

- Integrated frontend applications with backend services and REST APIs to support application functionality and data-driven workflows.
- Built WebSocket-based real-time features for dynamic data updates and real-time application interactions.
- Applied state management patterns and reusable component architecture to improve application maintainability and scalability.
- Collaborated in Agile development cycles including sprint planning, PI planning, and retrospectives.
- Managed Jira workflows and contributed to Software Requirement Specification (SRS) documentation.

Technology Analyst

Feb 2023 - Mar 2024

Invenics

Kochi, India

- Developed scalable frontend applications using ReactJS and modern JavaScript frameworks.
- Improved application performance and state handling using Redux-based architecture and reusable frontend development patterns.
- Defined and enforced frontend coding standards and architectural best practices.
- Integrated Firebase for real-time database operations and authentication systems.
- Collaborated with backend and cross-functional engineering teams to integrate APIs and deliver scalable frontend solutions.

Software Developer

Oct 2021 - Feb 2023

iLearning Engines

Kochi, India

- Developed and integrated REST APIs using Node.js and Express.js to enhance frontend-backend communication and support scalable application functionality.
- Built backend services using Node.js and Express.js across the development lifecycle, contributing to API development, integration, and application architecture.
- Developed ReactJS frontend components and managed application state using Context API for efficient data flow and maintainable application architecture.
- Integrated frontend applications with Node.js and Express.js backend services through RESTful APIs.
- Used Postman for API testing, request validation, debugging, and troubleshooting frontend-backend communication.
- Improved code quality and maintainability using SonarQube and JavaScript ES6+ best practices.
- Participated in debugging, testing, and code reviews to ensure application quality and maintainability.

React.js Intern

Mar 2021 - Sep 2021

Fortunesoft IT Innovations Pvt Ltd

Bangalore, India

- Successfully completed a 6-month internship in React.js Development, working closely with the company's development team.
- Developed frontend components using React.js while following industry-standard development practices.
- Collaborated with senior developers on application development, debugging, and feature implementation.
- Participated in debugging, testing, and code reviews to ensure application quality and maintainability.

PROJECTS

TalksSign

Developed organization-level e-signature workflow system for secure document signing. Built dynamic document handling with configurable signature fields and multiple signing options. Implemented role-based, multi-stage approval workflows for admins, reviewers, and clients. Integrated AI-driven document generation from key clause inputs with LLM-based signing support. Enabled secure email access with URL-based signing for a seamless cross-device

experience. Contributed to React-based frontend development, REST API integration, state management, and scalable application workflows.

NeoroTalks

Contributed to the development of an enterprise-grade Agentic AI platform, building scalable, secure, and production-ready applications. Designed and developed dynamic React-based dashboards for data visualization with responsive UI/UX. Implemented real-time AI-driven interactions and automation workflows, enabling intelligent task execution and communication. Integrated Microsoft Outlook and Gmail connectors into the frontend, allowing users to preview and send emails seamlessly within Agentic AI workflows. Delivered governed, auditable AI solutions optimized for enterprise production environments.

Southern California Edison

Worked on a large-scale ReactJS application modernization initiative to improve system scalability and user experience for a leading electric utility. Developed modules focused on electricity usage analytics and cost-saving insights, and managed version control, code merging, and deployment workflows using Git.

apnaAi

Contributed to product development by implementing Firebase authentication with role-based access control and scalable CRUD operations. Built push notification systems and optimized application performance using lazy loading, custom React hooks, and efficient routing strategies to enhance user experience.

iLearning Engines

Developed key features for an e-learning platform including test preview modules, role-based access enhancements, and module sequencing functionality. Developed and integrated REST APIs using Node.js and Express.js to support frontend-backend communication. Resolved critical UI issues under tight deadlines and ensured robust frontend-backend integration through validated API interactions.

EDUCATION

B.Tech in Computer Engineering , Kerala Technical University	2016 - 2020
Computer Engineering	

Higher Secondary Education , Kerala University	2014 - 2016
Computer Science
